EXPERIENCE

Freelance Developer (Agency, onsite) Feb 2025 – May 2025

- Built and deployed full stack web applications for clients using modern technologies and infrastructure.
- Worked using various CDN providers (Cloudflare, Akamai & Cloudfront) for hosting static sites.

DevOps Engineer - (US, remote) — [jnj.com](#) (howa.so) May 2025 – Aug 2025

- Scaled servers using **Autoscaling Groups** and drafted python clients for staging and pre-production.
- Assisted the Scale of **100 K** users under the mentorship of a Senior Engineer.
- Observability was handled using **Posthog** for (traces, telemetry & logs).

DevOps Engineer - (Canada, remote) — [peerplays.com](#) Aug 2025 – Mar 2026

- Launched Toto ([usetoto.com](#)) into production, a civic engagement platform that enables users to securely sign and send physical letters to elected representatives using blockchain-backed verification and an internal payment orchestration layer for multi-provider routing and scalable transaction processing.
- Scaled microservices using **ECS (Fargate)** and database using **AWS RDS** (with RDS proxy).
- Worked with CloudWatch to monitor application performance, logs, and infrastructure metrics.
- Managed AWS network infrastructure and administration responsibilities across cloud environments.

PROJECTS

Staging-ops — GitOps Infrastructure Repository — [GitHub](#) Aug 2025 – Nov 2025

- Built and maintained a centralized **GitOps repository** managing staging and production infrastructure for multiple personal projects using Kubernetes and Argo CD.
- Defined Kubernetes manifests, deployment configurations, and Argo CD applications for automated syncing, rollout management, and environment orchestration.

2D Metaverse — Browser-Based Virtual Workspace Platform — [GitHub](#) Jan 2025 – Present

- Built a **browser-based virtual office platform** enabling real-time collaboration through multiplayer interaction, proximity voice chat, and interactive shared spaces inspired by Gather Town.
- Implemented authentication with **GitHub OAuth and email verification**, realtime networking using WebSockets/WebRTC, and immersive 2D gameplay using Phaser.

SKILLS

Backend: Node.js, Golang, TypeScript, Python, PostgreSQL, Redis, WebSockets
Frontend: React, Next.js, Tailwind CSS
Infra: Docker, GitOps, AWS (EC2, S3), Cloudflare R2, ASGs
Languages: Golang, JavaScript, TypeScript
Tools: HTTPie, Docker

EDUCATION

Bachelor of Engineering, Computer Science 2022 – 2026 (Expected)
VJIT Hyderabad **CGPA: 8.02**
